

#InnovationRiga 2013

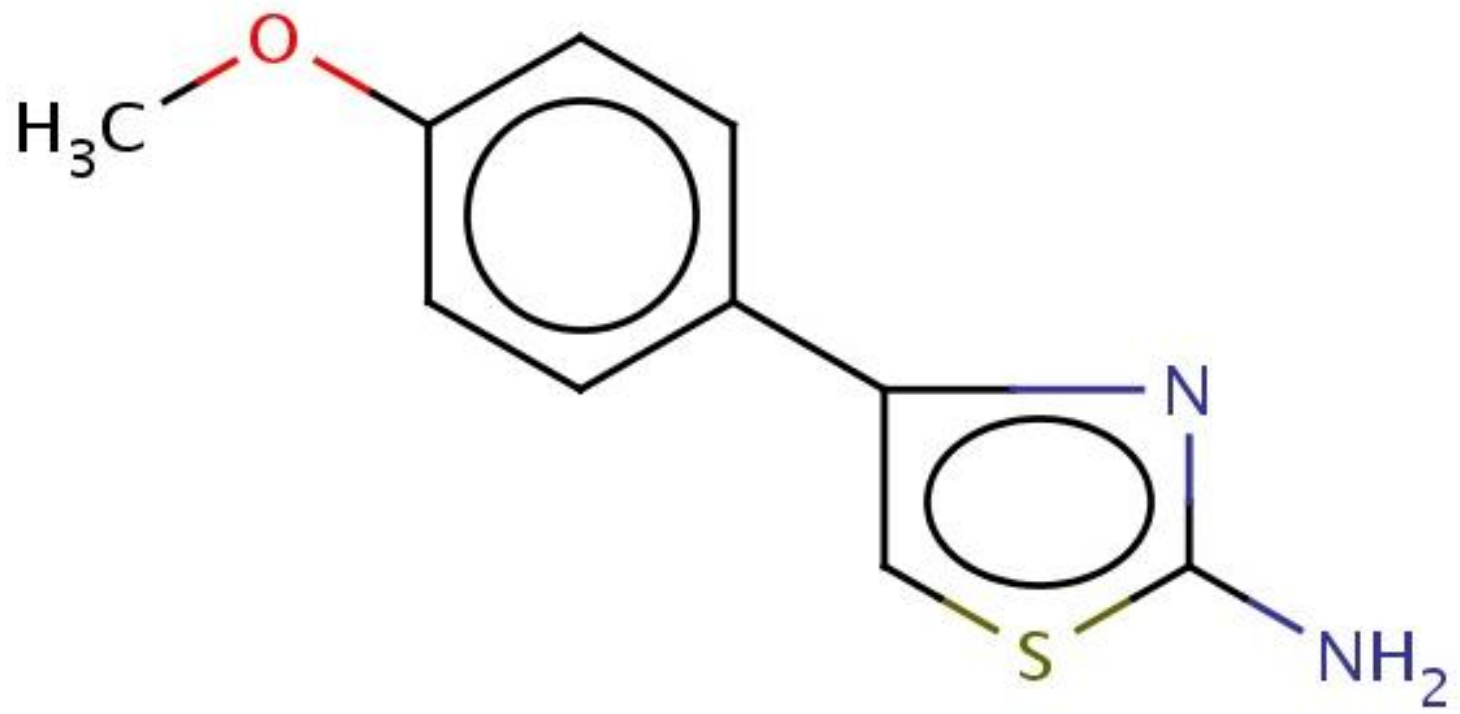

November 19, 2013

Imants Zudāns

R&D Chemical Market

- Thousands of suppliers
- Millions of products
- Global market
- Text search (e.g. Google) inefficient

4-(4-methoxyphenyl)-1,3-thiazol-2-amine

B2B marketplace

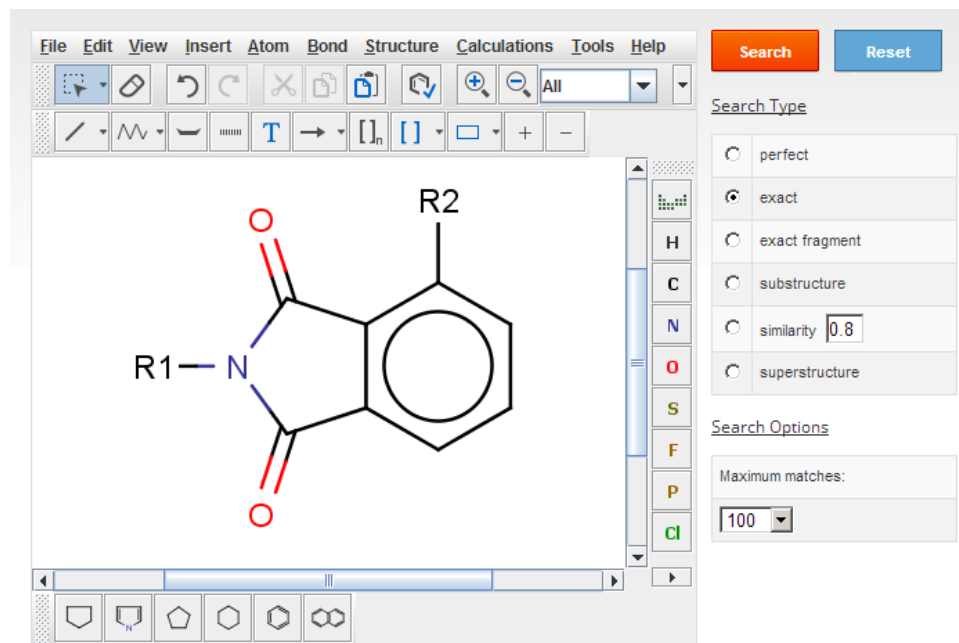

- > 50 million products listed
- Searchable chemical structure database

Chemical name

or

Structure

(4-amino-1,3-dioxoisoindol-2-yl)acetic acid

MolPort:

- decreases the time and cost of lab chemicals procurement
- enables easy access to novel compounds
- increases chemists' productive lab time

Clients Worldwide

9 out of 10 top universities in chemistry are MolPort clients

“My student found on MolPort something he had been struggling to synthesize for cheaper than his starting materials.”

Dr. G. Hutchison, [University of Pittsburgh](#)

Thank you!
