Who/why

Mission says it all

We are creating a generation of serial entrepreneurs in Latvia who innovate through science and build successful, global science based businesses.

Primary partnership

Accelerace Life

5 partners creating the first and only Nordic-Baltic Life Sciences business accelerator

Created a well researched, replicable system for taking start-ups and early stage companies and creating or validating (or not) scalable businesses

5 teams/companies

Some examples

- RSU TTO contract research leading to:

- pine needle extract that helps to renew stomach health condition.
Fitesten stimulates mucus secretion and a resurgence of stomach mucus.

RTU IP Spin off

- Conelum
- Innovative food testing
- Seed funding from Imprimatur

Biomedical Research and Study Center

- Innovative serum test for stomach cancer
