PERSONALISED MEDICINE SOLUTIONS IDEA GARAGE

We would like to invite you to participate in Estonia's first idea competition in personalised medicine! Personalised medicine is a fast-growing healthcare field that has great potential for developing new services and products.

If you have an idea that is **INNOVATIVE** and **EXCITING**, sign up and validate your idea through teamwork and mentoring!

Personalised medicine offers tailored solutions for the treatment and prevention of diseases

We are looking for ideas that solve medical and healthcare problems by using personalised medicine

We welcome people with different experiences and backgrounds (medicine, IT, business etc.), whether they are students, scientists, visionaries, entrepreneurs etc.
